**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary.

Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-3, 8, 9 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Number 2,470,238

Art Unit: 3711

(Correale et al., hereinafter Correale) in view of U.S. Patent Numbers 2,832,598 (Strub) and 3,811,673 (Baker).

Regarding claims 1, 3, 8 and 9, Figures 5-7 of Correale show a combined shuffleboard and billiard game assembly including a rectangular playing surface 32 and elongated rails 37 with arcuate end portions. Correale also discloses the usual shuffleboard pieces used to play the game. See column 3, lines 24-25. Strub shows in Figure 1 that typical shuffleboard cues are elongated members. Correale does not show the elongated rails to be removably engaged to the playing surface or bumpers attached to the rails. However, it would have been obvious to one of ordinary skill in the art to make the Correale bumpers removably engaged in view of Baker who discloses that such removability allows for easier repairs. See Baker at column 1, lines 20-24. Further, Figure 3 of Baker shows that bumpers can be attached to the rails.

Regarding claims 2 and 14, triangular racks are well-known in the billiard game art to arrange the playing pieces at the start of the game.

#### ***Double Patenting***

4. Applicant is advised that should claim 2 be found allowable, claim 8 will be objected to under 37 CFR 1.75 as

Art Unit: 3711

being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim.

See MPEP § 706.03(k).

#### ***Allowable Subject Matter***

5. Claims 4-7, 10-13 and 15-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
